

WHERE CAN I HAVE A FACET JOINT INJECTION?

An appointment is required for all Facet Joint Injections. Please bring all your previous scans to your appointment.

SKG BUNBURY

55 Spencer Street, Bunbury
T: 9722 3200 F: 9721 5385

SKG COCKBURN

Cockburn Health & Community Centre
5 / 11 Wentworth Parade, Success
T: 9494 3500 F: 9499 3597

SKG CURRAMBINE

1 / 1 Hobsons Gate, Currumbine
T: 9301 7000 F: 9304 0387

SKG DUNCRAIG

Suites 3-5, 54 Arnisdale Road, Duncraig
T: 9246 8800 F: 9448 0508

SKG FREMANTLE

201 High Street, Fremantle
T: 9435 9500 F: 9430 6693

SKG HOLLYWOOD

Hollywood Private Hospital
115 Monash Avenue, Nedlands
T: 9449 5800 F: 9389 8112

SKG KELMSCOTT

2964 Albany Highway, Kelmscott
T: 9495 9300 F: 9495 4117

SKG MANDURAH

160 Pinjarra Road, Mandurah
T: 9582 4500 F: 9534 8502

SKG MIDLAND

164-168 Great Eastern Highway, Midvale
T: 9218 6600 F: 9218 6680

SKG MORLEY

Units 5 & 6, 11-13 Marchant Way, Morley
T: 6278 0400 F: 9375 1148

SKG MT LAWLEY

St John of God Mt Lawley Hospital
Thirlmere Road, Mt Lawley
T: 9471 6900 F: 9471 6955

SKG MURDOCH

St John of God Medical Clinic
100 Murdoch Drive, Murdoch
(ent. off Barry Marshall Pde - Gate 1)
T: 9333 9200 F: 9333 9286

SKG ROCKINGHAM

8B Leach Crescent, Rockingham
T: 9527 0000 F: 9592 5097

SKG SUBIACO

St John of God Subiaco Hospital
12 Salvado Road, Subiaco
T: 9286 6400 F: 9286 6481

SKG VICTORIA PARK

771 Albany Highway, Victoria Park
(ent. off Sussex Street)
T: 6253 9100 F: 9362 2096

SKG WEMBLEY

5 Station Street, Wembley
T: 9489 0800 F: 6380 2036

SKG WEXFORD

Wexford Medical Centre
Suites 10-12, Barry Marshall Parade
(Gate 2), Murdoch
T: 6436 2500 F: 9332 0047

SKG WILLETTON

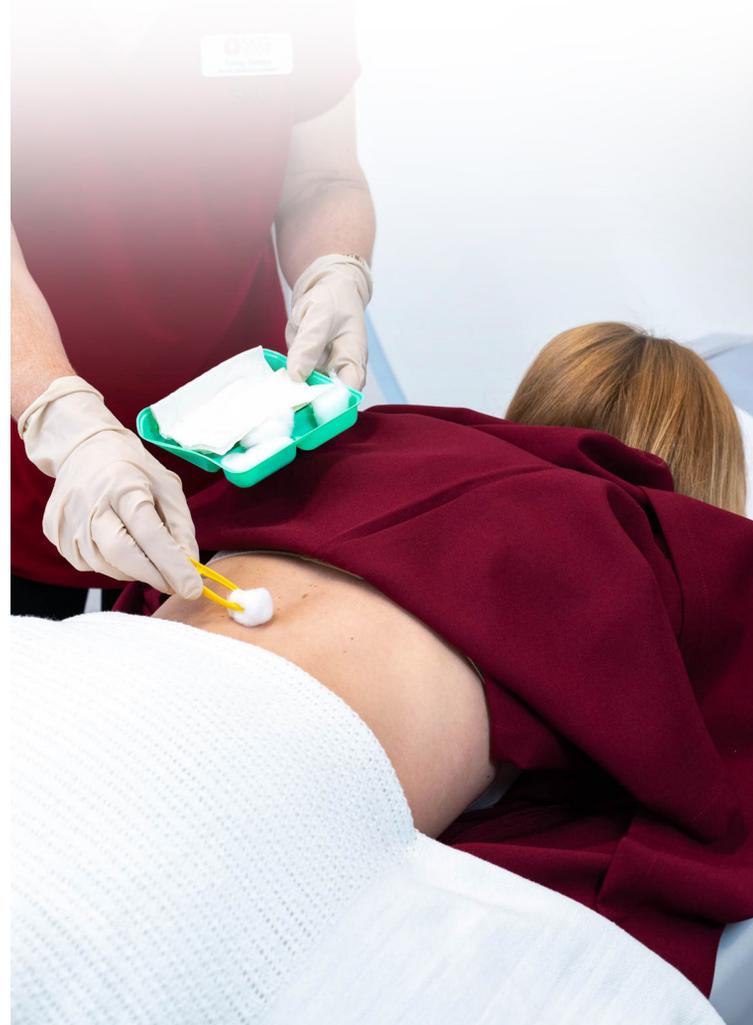

Unit 1, 187 High Road, Willetton
T: 9354 0900 F: 9457 4934

SKG WOODVALE

3 Castlegate Way, Woodvale
(cnr. Ocean Reef Road & Trappers Drive)
T: 9408 3600 F: 9309 5535

YOUR GUIDE TO

FACET JOINT INJECTIONS

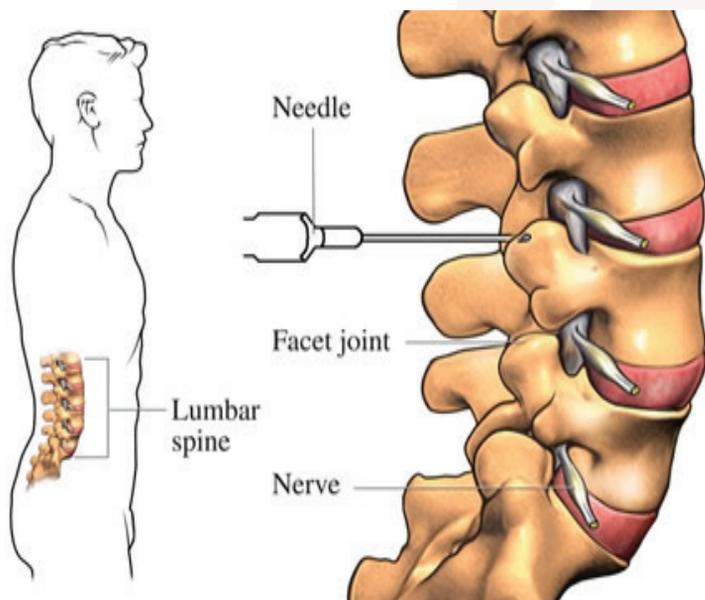

WHAT IS A FACET JOINT INJECTION?

Facet joints are small joints at the back of the spine that provide stability to the whole vertebral column. There are facet joints in your neck (Cervical), upper back (Thoracic) and lower back (Lumbar) which allow for forward, backward and side-to-side movement of the spine.

Over time, facet joints can become arthritic and inflamed resulting in pain.

A Facet Joint Injection administers a local anaesthetic and/or steroid into and around the facet joint to relieve pain associated with worn or inflamed facet joints (see diagram below).

DIAGRAM

PATIENT PREPARATION

There is no specific preparation. You will need to bring any x-rays or scans that you have.

Please inform us if you have any allergies or take any medication that thins the blood, such as Warfarin or Plavix, as this may need to be adjusted by your doctor prior to the injection.

If you are attending for a Cervical Facet Injection, you are not able to drive yourself home after this procedure. Therefore, you must organise a driver to bring you in and pick you up after the procedure.

The procedure itself will take approximately 20 minutes. However, with preparation and recovery times, you may be in the Radiology department for up to 2 hours.

You will be asked to change into a gown. You will be given a consent form to read and sign prior to the procedure which outlines what to expect and risks associated with this procedure. A member of staff will explain the procedure in detail. If you have any concerns or queries, please let the staff member looking after you know.

WHAT HAPPENS DURING THE FACET JOINT INJECTION?

The procedure is performed in the CT scanner room and takes about 20 minutes. Firstly, the skin on your back is cleaned with antiseptic solution, then a local anaesthetic is injected by the Radiologist with a small needle. This will sting for a short time as the anaesthetic takes effect.

The Radiologist then positions the needle under the guidance of the CT images to ensure the needle is in the exact location of the facet joint. When the needle is in the correct position, the mixture of anaesthetic and steroid is injected. You may experience some pressure or discomfort during the injection.

WHAT HAPPENS AFTER THE PROCEDURE?

Pain relief can be instantaneous due to the local anaesthetic, however, this wears off after several hours and occasionally patients experience temporary discomfort in the area as a result. Continue with your normal medication during this period.

Lasting relief from the steroid often takes a few days to develop. You will be given a pain chart to record your pain relief for your referring doctor.
