

# EOS IMAGING

*Expanding Our Market Leading Service*

EOS Weight Bearing Spinal and Lower Extremity Imaging  
Now Available at **multiple locations**

## WHAT ARE THE BENEFITS OF EOS TO PATIENTS?

- EOS provides high quality images with either a **low radiation dose** - up to 9 times less than conventional CR systems, or **micro dose technique** - up to 45 times less than conventional CR.
- EOS is quick. An entire body scan takes about 20 seconds for an adult and about 15 seconds for a child, and the images can be reviewed instantly.
- EOS provides extremely detailed, high-quality images that can improve the referrer's ability to see, diagnose and treat orthopaedic conditions more effectively particularly for pathologies which require frequent monitoring such as scoliosis.
